NADIA GILL

ML Platform / AI Engineer

Rawalpindi, Pakistan | nadia.gill@example.com | Professional experience: 4 years 3 months

PROFESSIONAL PROFILE

ML platform and applied AI engineer with 4 years 3 months of professional experience delivering training workflows, inference APIs, LLM-backed summarization products, and operational model monitoring.

TECHNICAL SKILLS

- Python, PyTorch, TensorFlow, scikit-learn, transformers, NLP
- Hosted LLM API integration, function calls, JSON output validation, prompt experiments
- Prefect and Airflow orchestration, custom tool routing, conditional review gates
- Model monitoring, F1, AUROC, regression slices, retrieval evaluation, drift dashboards
- Google Cloud Run, Vertex AI, Pub/Sub, Docker, FastAPI, Terraform

PROFESSIONAL EXPERIENCE

AI Platform Engineer | Quanta Commerce (fictional) | **Jul 2022 - Present**

- Built a Python-based model-serving stack handling daily inference runs for classification and AI summarization.
- Integrated hosted LLM APIs into a summarization review application with prompt versioning and human checkpoints.
- Created custom conditional orchestration for extraction, retrieval and validation using Prefect tasks and Python state transitions.
- Trained a PyTorch intent model and TensorFlow feature extractor; kept training data lineage and independent test splits.
- Monitored retrieval quality, latency, failures and model drift in Google Cloud-based deployments.
- Maintained a production release process with staged rollouts, trace logging, and operator handover documents.

SELECTED PROJECT OUTCOMES

LLM review pipeline: Hosted chat APIs + Prefect tasks; transferable chaining and branching, but no direct LangChain usage.

ML inference platform: Containerized PyTorch and TensorFlow services with CI gates.

EDUCATION AND NOTES

- BS Computer Engineering | Northern University (fictional), 2022
- Has not used LangChain or LangGraph in production; no medical-imaging experience reported
- Professional applied ML tenure: Jul 2022 - Oct 2026 (4 years 3 months)
