TAIMOOR IQBAL

Applied AI Research Associate

Islamabad, Pakistan | taimoor.iqbal@example.com | Professional experience: 3 years 7 months

PROFESSIONAL PROFILE

Applied AI research associate with 3 years 7 months of professional NLP and deep-learning research, dataset annotation workflows and model benchmarking. Research results are reproducible but production software deployment is limited.

TECHNICAL SKILLS

- Python, PyTorch, transformers, Hugging Face, NLP preprocessing
- Machine learning, deep learning, text classification, summarization evaluation
- Retrieval evaluation, recall@k, macro F1, calibration, annotator agreement
- Custom Python prompt chaining and hosted LLM APIs for experimental prototypes

PROFESSIONAL EXPERIENCE

Applied AI Research Associate | LanguageLab Research (fictional) | **Mar 2023 - Present**

- Benchmarked transformer summarization and classification models using Python/PyTorch with held-out test sets.
- Built an experimental RAG pipeline from local document embeddings, retrieval, and hosted LLM API calls using plain Python.
- Measured supported-answer rates using annotated references and measured class imbalance across multilingual datasets.
- Managed experiment tracking and model reproducibility reports across 12 research iterations.
- Published research artifacts for collaborators; production service operation or deployment was not part of the role.

SELECTED PROJECT OUTCOMES

RAG prototype: Custom Python retrieval and LLM composition demonstrates transferable chain design, not explicit LangChain use.

Text labelling study: PyTorch NLP model comparison; experiment and error-analysis evidence.

EDUCATION AND NOTES

- MSc Artificial Intelligence | West Research Academy (fictional), 2022
- No direct LangChain/Google Cloud/Node.js/Firebase experience shown
- Professional research tenure: Mar 2023 - Oct 2026 (3 years 7 months)
