AMAL RAZA

Cloud Application Engineer

Lahore, Pakistan | amal.raza@example.com | Professional experience: 4 years 9 months (cloud/software)

PROFESSIONAL PROFILE

Cloud application engineer with 4 years 9 months of professional Node.js and Python backend integration experience. Built operational APIs, logging and deployment systems; recent LLM feature work is narrower than full ML engineering.

TECHNICAL SKILLS

Node.js, TypeScript, Python, FastAPI, REST, event-driven services	Google Cloud Run, Firebase Auth, Firestore, Pub/Sub, Cloud SQL
Hosted LLM API integration for summaries, request validation, structured output	Docker, Terraform, CI/CD, observability, rate limiting, incident response

PROFESSIONAL EXPERIENCE

Cloud Application Engineer | Riverfront Apps (fictional) | **Jan 2022 - Present**

- Built and supported Node.js APIs on Cloud Run and Firebase user workflows for business applications.
- Integrated a hosted LLM API in 2026 for a user-support summarization endpoint with prompt guardrails and audit logging.
- Added retriable request queues, monitoring, deployment rollback steps and cost reporting to cloud services.
- Implemented structured API validation and integrations for external ML inference services managed by a separate data-science team.
- Has not trained or evaluated deep-learning models as a professional responsibility.

SELECTED PROJECT OUTCOMES

LLM-assisted customer notes: LLM API wiring, system prompts and structured output; demonstrated integration but not independent ML model evaluation.

Event-driven service platform: GCP and Firebase API design, production monitoring and deployment.

EDUCATION AND NOTES

- BS Software Engineering | City College of Technology (fictional), 2021
- Professional cloud/software tenure: Jan 2022 - Oct 2026; AI/ML-specific tenure is substantially shorter
- Currently exploring PyTorch and LangChain tutorials, without completed professional projects
